Box No. I Basis of the report

1. With regard to the **language**, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.
- ☐ This report is based on translations from the original language into the following language , which is the language of a translation furnished for the purposes of:
- ☐ international search (under Rules 12.3 and 23.1(b))
 - ☐ publication of the international application (under Rule 12.4)
 - ☐ international preliminary examination (under Rules 55.2 and/or 55.3)
2. With regard to the **elements*** of the international application, this report is based on *(replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):*

Description, Pages

1-12 as originally filed

Claims, Numbers

1-38 as originally filed

Drawings, Sheets

1/10-10/10 as originally filed

☐ a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing

3. ☐ The amendments have resulted in the cancellation of:
- ☐ the description, pages
 - ☐ the claims, Nos.
 - ☐ the drawings, sheets/figs
 - ☐ the sequence listing (*specify*):
 - ☐ any table(s) related to sequence listing (*specify*):
4. ☐ This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).
- ☐ the description, pages
 - ☐ the claims, Nos.
 - ☐ the drawings, sheets/figs
 - ☐ the sequence listing (*specify*):
 - ☐ any table(s) related to sequence listing (*specify*):

* If item 4 applies, some or all of these sheets may be marked "superseded."

Re Item V

**Reasoned statement with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement**

1. The document D1 is regarded as being the closest prior art to the subject-matter of claim 1, and shows (the references in parentheses applying to this document): a laminated sheet of paper material, comprising at least a first ply and a second ply which are coupled to each other by means of glue, wherein said first ply has a first embossing in a direction according to at least one alignment, and the second ply is printed with a decorative pattern. A shading effect simulating a textile product is achieved thanks to the combination of the printed pattern and the embossing pattern, when observing the laminated sheet from a certain angle. The use of this laminated sheet in the manufacture of disposable products based on paper, especially paper towels, and method of making are as well disclosed therein (**claims 1-16,23; page 1, lines 10-23; page 1, line 23-page 2, line 4; page 3, lines 12-25; page 4, lines 8-18; page 5, line 30-page 6, line 13; page 6, line 40-page 7, line 4; page 7, lines 11-20**).

2. The subject-matter of claim 1 differs from this known D1 in that the decorative pattern of the second ply is responsible alone for the shading effect, which moreover gives the user a three dimensional feeling.

The subject-matter of claim 1 is therefore new (Article 33(2) PCT). The same reasoning applies for the subject-matter of claim 20.

3. The effect linked with the additional technical feature of claim 1 is to improve the appearance of the sheet (see page 3, lines 23-28). The problem to be solved by the present invention may therefore be regarded as providing an aesthetically pleasing laminated sheet with the aspect of a three dimensional product.

Document D1 describes a three dimensional structure as such, made from an embossed sheet and a printed sheet; whereas the application discloses that the printing only gives the impression of a three dimensional relief. Starting from D1 or another document of the prior art, the skilled person would not select naturally such a printing, among all other possibilities for improving the appearance of a laminated paper sheet, in order to solve the

above mentioned problem. The solution to this problem proposed in claim 1 of the present application is thus considered as involving an inventive step (Article 33(3) PCT).

The subject-matter of claim 20 does accordingly involve an inventive step too (Article 33(3) PCT).

4. Claims 2-19 and 21-38 are dependent respectively on claims 1 and 20, and as such also meet the requirements of the PCT with respect to novelty and inventive step.
